One of the biggest costs of natural disasters and cyberattacks is enforced downtime for businesses.

Supports all operating systems, databases and third-party applications.

Get fast, simple backup and an easy way to restore lost files.

A way to reduce application downtime and data loss for both planned and unplanned outages.

Requires minimal technical support.

Top-grade protection at prices small businesses can afford.

For a small business with 5 computers you could:
• back up these machines' files to the cloud at $45 per month, and
• have a disaster recovery solution in place for your server at $37 per month.

Let us keep you safe.

What would it cost if your business systems were down for a week?

119 minutes
Average recovery time following datacentre outage

Downtime costs most small and medium businesses US$20,000 per hour

$8,780
Average cost of tape backup

Disaster Recovery:
Create a replica of your office in the cloud so if your office is damaged (e.g., due to fire, natural disasters, or burglaries), your applications and databases keep working.
